I am a mobile application developer with around four years of Android Application development experience. Over the years, I have worked on challenging projects which keeps boosting me to learn, explore, implement new and challenging things. I've played roles in almost every aspects of the software development, like communicate with users, technical teams, and management to collect requirements, describe software product features and technical designs, project documentation. Worked on Android apps which includes :

- Android Frameworks/Technologies - Activity life cycle, Fragments, Services, Broadcast Receiver, AppCompat and Support libraries, Material Design
- Design Pattern : MVP
- Reactive Extensions : RxAndroid
- Dependency Injection : Dagger2
- Networking - Retrofit, OkHttp3, Volley
- Client-Server - REST, HTTP Web Services, WCF
- Data Parsing - JSON, XML, SOAP
- Data Storage - SQLite, Content Providers, Shared Preferences, External Storage
- Background Processing and Multithreading - Service, AsyncTask
- Image downloading – Glide, Picasso
- UI development - Native UI controls, Custom UI Controls, Animation
- Multimedia - Camera, Gallery, Audio, Video
- Video - TextureView with native MediaPlayer, ExoPlayer, Vitamio, grafika
- Social Network Integration - Facebook, Twitter, google plus
- Payment Gateway - PayPal, WePay
- Third Party API - Shopify, Google, Firebase
- Third Party libraries - Credit-Card Scan, barcode scanner
- Analytics tools - Google analytics, Firebase
- Ads - AdMob
- Chat – ejabberd, openfire
- Location - Maps, Network Provider, GPS, Fused Location Provider
- Push-Notification - GCM, FCM
- In-app purchase - In-app Billing API
- Version Control systems - GIT,SVN and planning basic branching and merging
- Testing – Espresso
